

NCR Corporation - Expression of Interest – ICT-PSP

Instrument: Pilot B, Thematic Network

Programme: ICT Call 4 (ICT-PSP Call 4, theme 3.3) e-Accessibility for Public Digital Terminals

Nature of collaboration: NCR Corporation is seeking to participate in ICT PSP Call 4, theme 3. 3. (e-Accessibility for Public Digital Terminals).

This call is intended to validate innovative services to enhance accessibility to public digital terminals in real life settings. The aim is to accelerate and boost a common approach to deployment of accessible technology in this sector.

NCR is seeking partners and a coordinator for this call. NCR would like to explore collaboration with partners offering innovative accessible technologies for public digital terminals, as well as with partners across the full supply chain.

Partner type: accessible technology developers; deployers of public digital terminals; user advocacy groups; universities; potentially also manufacturers.

NCR offering: expertise in integration and testing of accessible technologies; universal access expertise; extensive Europe-wide customer base to facilitate deployment and testing of new technologies; support services for maintenance of newly deployed technologies.

NCR locations: UK (Dundee) and Ireland (Dublin)

About NCR

NCR is the largest producer of self service technology and products in the world. NCR's assisted- and self-service solutions and comprehensive support services address the needs of retail, financial, travel, healthcare, hospitality, gaming and public sector organizations in more than 100 countries.
