

## YUVAM GROUP IT COMPANIES

Yuvam Group was established in 1984. It was professional on e-Municipality Automations, Smart Urban Information System, Management Information System and also Geographic Information Systems. Yuvam Group has already had many application areas for such software and automations on Public and Private sectors. Head quarter of Yuvam Group is in Istanbul, also there are four different district offices on Adana, Bursa and Ankara. There are almost 100 employees currently recruit in those offices.

All of our software and automations such as ***e-Municipality Information System, Smart Urban Information System, Vehicle Training System, Documents Management System, Planning and Development Information System, Water Administration Management Information System, Infrastructure Information System***, are based on internet and intranet also all of them are completely interactive. These mentioned projects designed and prepared accordingly e-Government conception and integrated between all departments in the corporation.

Yuvam Group has recruited all experienced engineers and database designers, and follows up the new technologies and creates new approach according to latest progress. Behind creating solutions to all Public and Private sectors, Yuvam Group have many partnerships for different projects which are leader on their field. With these project partnerships, Yuvam Group can easily support Turn-Key project with all hardware and software.

Our automations and Turk Key project does not bring any extra cost to corporation, also our project has open systems architecture which allows to corporation to contact other corporations system.
