

ETEN IS A EUROPEAN COMMUNITY PROGRAMME PROVIDING FUNDS TO HELP MAKE E-SERVICES AVAILABLE THROUGHOUT THE EUROPEAN UNION.

eTEN Programme is meant to support the deployment of trans-European e-services in the public interest. The programme aimed to accelerate the take-up of services to sustain the European social model of an inclusive, cohesive society. eTEN's six themes include:

- eGOVERNMENT;
- eHEALTH;
- eINCLUSION;
- eLEARNING;
- SERVICES FOR SMES;
- TRUST & SECURITY.

The success of e-services can be especially difficult to predict when they are provided in more than one country. There may be language difficulties. There may be differences in culture and in legal and administrative environments. There may be problems in making computer applications compatible with each other. Customer service, maintenance of information or physical stockpiles, delivery, marketing and promotion may also need to be adapted to local conditions.

THIS IS WHERE eTEN COMES IN.
